NuMI-MINOS Status Report

Benton Pahlka

Live Time: 71.3% good physics data
POT Fraction: 99.6% good physics data

- During target shutdown
  - Fan replacement went smooth
  - General crate survey complete
  - Electronics test stand in operation
- General crate survey
  - Confirmed good PS voltages for 2 crates
  - PS voltages stable compared to 2005
- Electronics test stand
  - Designed to test read out processors (ROPs)
  - Old style ROPs will not be repaired in the future
  - Goal is to fix/diagnose ROPs on-site when possible
  - Can now use old style and new style (ROPs)
  - Ready to test new ROPs in the detector

NuMI-MINOS Status Report

Live Time: 92.9% good physics data
POT Fraction: 99.8% good physics data

- Generally smooth running
- A few hot and cold chips
- A couple of run crashes at the ends of runs
