

NuMI-MINOS Status Report – Greg Pawloski

All Exp Mtg
July 6, 2009

NEAR DETECTOR:

- Powered down for first power outage
 - Lost one PS on power-up
- Detector taking cosmic data
- Coil PS: substantial preventative maintenance
 - Trying to retap at 15 V (instead of 30)
 - PS may not meet spec. @ 15 V – forcing us back to 30 V
- Plan for coming weeks:
 - Rack-testing and cleaning
 - Off spanning next 2 outages
 - Then, On until start of run

NuMI-MINOS Status Report – Greg Pawloski

July 6, 2009

FAR DETECTOR:

- Running in reversed field
 - Reversing procedure worked without problem
- Smooth running otherwise
- Upcoming planned maintenance
 - Chilled water upgrade
 - Rack testing
 - Coil PS
 - Network
 - UPS Battery replacement
- Otherwise, plan running reversed field when possible
