

NuMI-MINOS Status Report — Bob Zwaska

All Exp Mtg
Aug. 3, 2009

NEAR DETECTOR:

- Presently powered-down
 - Spanning two power outages
- General Cleaning and testing this week
- Power-up and final maintenance next week
- Then, run until beam starts

- Persistent issues
 - Minor cooling-water improvements will allow us to run consistently at elevated temperatures for an extended period
 - Still need a permanent solution to underground cooling as more experiments come online
 - Coil power supply requires augmentation to run in a more reliable mode
 - Hope to have this done this fall

NuMI-MINOS Status Report — Bob Zwaska

All Exp Mtg
Aug. 3, 2009

FAR DETECTOR:

- Running in reversed field
 - In anticipation of antineutrino running
- UPS Battery replacements ordered
 - Install when delivered
- Coil PS maintenance this week
- DAQ maintenance this week
- Rack testing this week
- Network upgrade likely delayed
 - Slow procurement means that parts will probably come after shutdown ends
- Plan to be running continuously in a week or two`
