

NuMI-MINOS Status Report

Carlos Escobar/UNICAMP

Covering week: 09/20 to 09/27

NuMI beam off since September 17 at 07:00h.

And will remain **off** until new target (NT05) is ready to be installed: current estimate is first week of November.

All MINOS shifts are cancelled until then.

On the positive side:

ACNET beam data logger problems: **SOLVED** (thank you to all involved)

Summary

- ND Summary

On all the period: 99.7% live time

- FD Summary

problems with one **Read Out Processor**

made DAQ crash over the weekend, not possible to recover despite intervention by the mine crew on-call.

Replace it today (09/27)

FD livetime: 82%
