

NuMI-MINOS Status Report

All Exp Mtg
5-Feb-07

- HV101 replacement
 - Estimated 70hrs
 - Actual 52hrs
 - Many thanks to the cast of dozens
 - **Mike Petkus + AD Mechanical**
- On NuMI startup, beam came right back where it was supposed to be
 - New magnet put back in pretty much the same place (*thanks Survey!*)
 - New magnet has near-identical B-field properties as old
- Took beam 22:00 Friday - 02:00 Sunday
 - But ACNET problems caused missing Toroid information from 13:00 Saturday
 - Detectors were up for all beam-time, but missing POT information means no ability to normalize, and data cannot be used for analysis

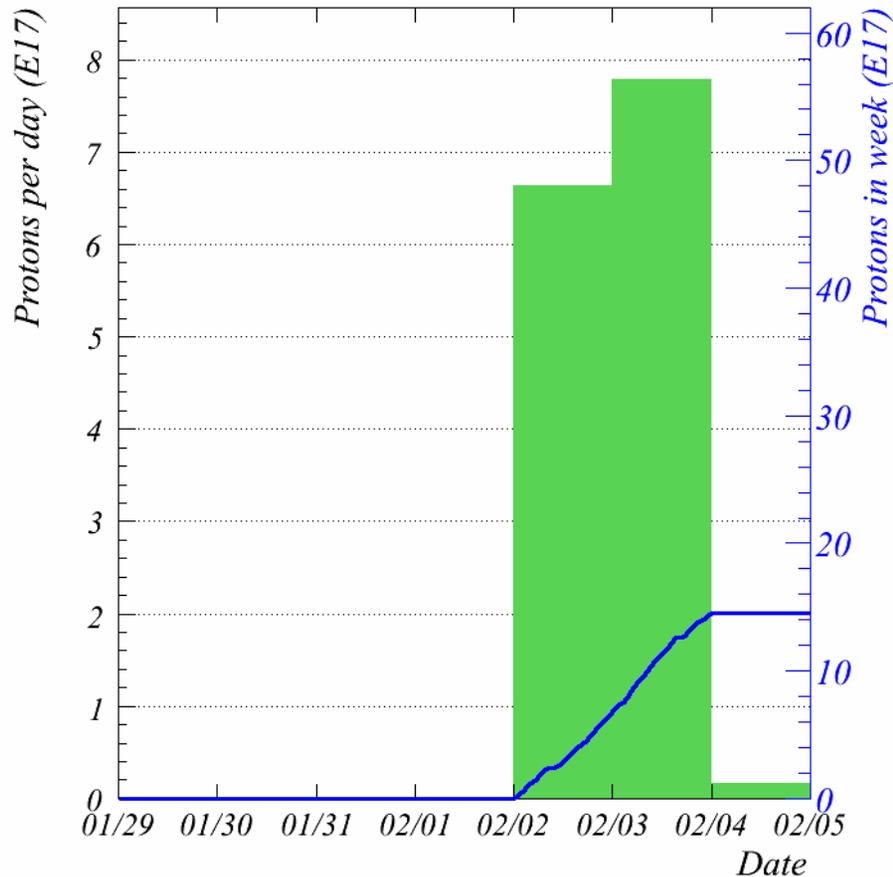

NuMI-MINOS Status Report

All Exp Mtg
5-Feb-07

Week to 00:00 Monday 05 February 2007

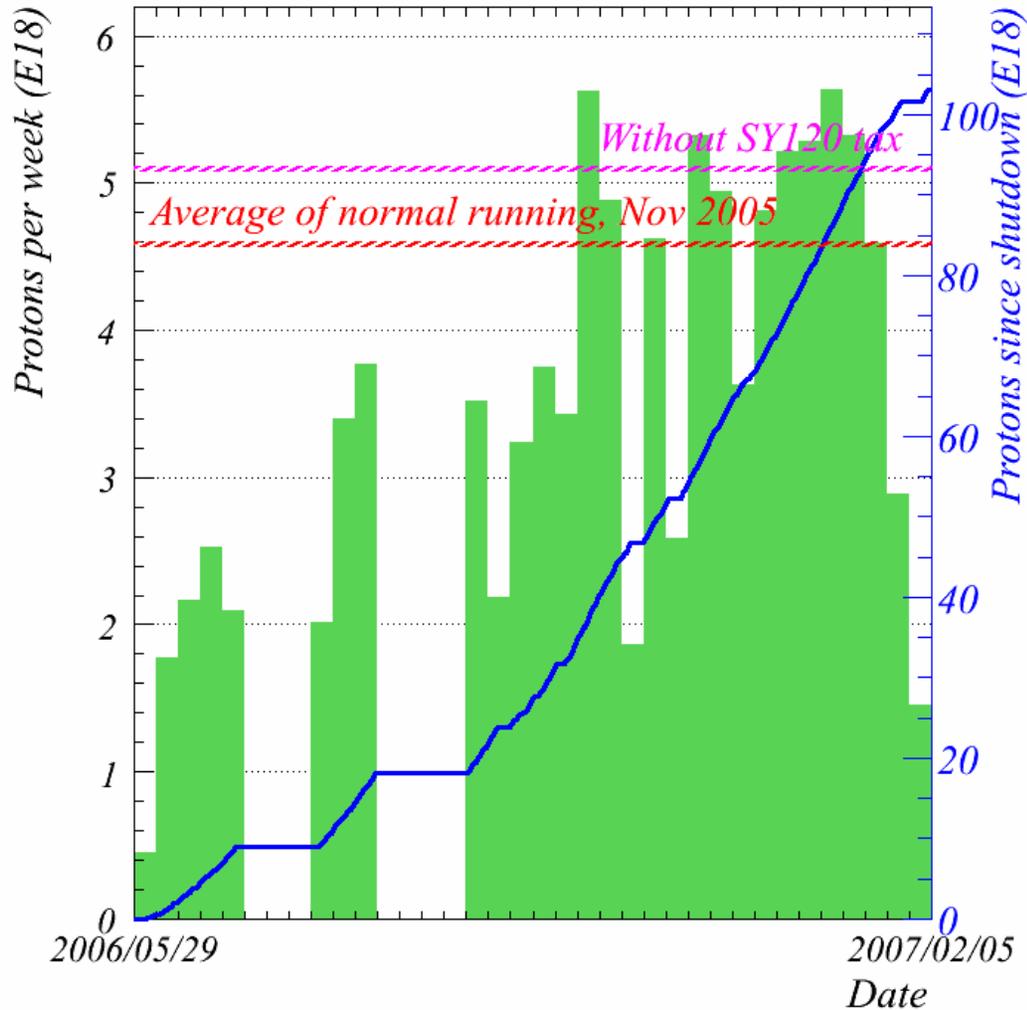

- Incomplete POT readings on Saturday
- Cannot say this plot reflects actual beam delivered

NuMI-MINOS Status Report

All Exp Mtg
5-Feb-07

Weekly protons to 00:00 Monday 05 February 2007

A low week even if we knew what additional POT to add in
