

MINOS Status Report

Benton Pahlka

NEAR DETECTOR

- Live Time: xx.x% good physics data
- POT Fraction: xx.x% good physics data
- ◆ Will have numbers above next week
- ◆ *Mostly* unaffected by network outage
 - Beam data logging on 2 machines
 - Backup ntuple dump if necessary
- ◆ All machines moved away from /afs
- ◆ We now have shift monitoring running on remote shift scripts in the CR
- ◆ Thanks to Art Kreymer for his hard work!

MINOS Status Report

FAR DETECTOR

- Live Time: 99.5% good physics data
- POT Fraction: 99.2% good physics data
- ◆ Need better coordination of when we expect known beam downtimes
- ◆ Translates to me better informing shifters of their role (...working on this)
