

# MINOS+ Status Report

Donatella Torretta  
All Experimenters' Meeting  
October 19, 2015

# MINOS+ readiness

## **FD – all shutdown’s work done : ready to take data**

- Failed TCU board will be shipped to Oxford tomorrow
- Running fine with replaced board

## **ND – all shutdown’s work done: ready to take data**

- Master crates fan packs filters & front racks filters have arrived and we started replacing them today
- Dead readout channel was fixed last week replacing the Minder board
- Some warm channels have been replaced this morning
- Occasional single warm/hot channels are NOT causing data to be flagged bad: they can be masked in offline reconstruction until replaced as opportunities arise

**MINOS+ is READY for BEAM**

Go Cubs!
